The History of OpAlert

What is it?

OpAlert was made to help with life: Making it the most convenient and time effective way for Private Anaesthetists and Surgical Assistants to find and accept cases and lists with their favourite surgeons.

Why was it created

Created through the minds of Surgeons, Anaesthetists and Surgical Assistants, a team of like minded individuals throughout Australia developed one of the most advanced and tested apps available, and the first of its kind in one dedicated function:

**To make the lives of Surgeons easier
by supporting Anaesthetists and Surgical Assistants**

Did you know that up to 84 minutes per day can be spent by a Surgeon, Personal assistant or Secretary trying to finalise the Anaesthetists and Surgical assistant for an operating list? Surgical assistants and anaesthetists know that answering phone calls and emails throughout a day can be disruptive!

Where is it based?

OpAlert is Australia wide. Our home base is in Adelaide, and our team is spread out across Australia. Our entire team of coders, developers, servers and doctors are all based locally, so you can trust that everything is Australian Owned, and operated.

Who is OpAlert for?

Private Anaesthetists and Surgical Assistants who want to find more work easily, and who want to work when, where and with who they want. It was designed to even help Anaesthetists who work in the public sector to find work on non clinical days, or weekends if they want to work in the private sector.

How does it work

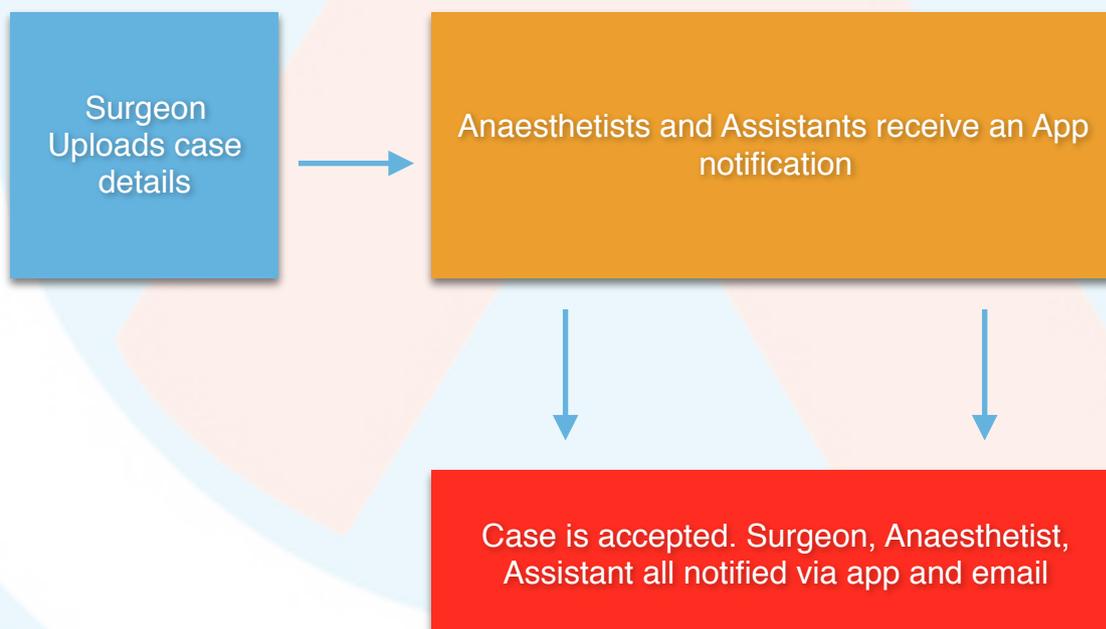

Setting up your account

Anaesthetists and Surgical Assistants will need to sign up using our native iOS or Android apps (Search the App Store or Google Play for “OpAlert”). You will need to provide a form of identification, as well as relevant AHPRA or ANZCA numbers. Once we have verified your account, you are ready to setup some preferences, and this is where you get to customise your experience with OpAlert.

- Anaesthetists can indicate an admin email to help notify their admin staff of cases they have agreed to do.
- Assistants and Anaesthetists can change their availability at any time.
- Change the specialties you are willing to attend lists for (ie Orthopaedic/General)
- What hospitals you work at

Once you've sent these details, we will approve your account. Have a problem? Send us an email at support@opalert.com.au and we will get back to you within 12 hours.

How does the notification system work

A surgeon will upload a case via the iOS or Android app (or via the web app). Anaesthetists and/or Surgical Assistants will need to use their iOS or Android apps and be logged in to be notified instantly. You will only be notified if your Hospital Selection, Availability, and Specialty preferences match.

Frequently Asked Questions

How much does it cost

OpAlert is simply the cheapest way for Assistants and Anaesthetists to find work. And nothing is cheaper than currently being completely FREE.

How do I accept a case/list

If you are logged into your app on your phone, you will receive the FIRST notifications of a case. This happens almost instantly when a surgeon uploads the details. You just need to open the details of the case and accept the case. You will receive a notification in your App and via your supplied email if you have been successful.

How Secure is OpAlert?

We take security very seriously. In fact, our SSL encryption is one of the highest in the industry standards. All data is encrypted, and sent over encrypted channels. Our servers are all based in Australia meaning that your data is never going back and forth around the world.

OpAlert will never distribute or release your information to 3rd parties, unless required to by Australian law.

Why do you need my AHPRA/ANZCA numbers

We need to ensure that the people who join OpAlert are who they say they are. That is why we ask for a photo of a form of identification (ie drivers license, medicare card, hospital ID) as we manually verify each case. We want to create the best experience possible for all the doctors involved, and that starts with confirming who you are. The same happens when you sign up to a surgical assistant service or join a group with other anaesthetists.

What happens if I can't make it anymore?

We know that things happen, and we would encourage everyone to be sure that they can make the case/list. If you can't make it, just go to the confirmed tab on your app, and cancel your availability. We will send a notification to the surgeon immediately that you can no longer make the case, and will fill the spot with another doctor.

How do I talk to the surgeon after accepting a list?

Anaesthetists will receive the contact details of a surgeon, so you can discuss any finer points for the list. Surgical assistants will not receive contact details.

I keep accepting cases but I never get them

OpAlert runs off a priority system, whereby those anaesthetists and surgical assistants who are accredited in the same hospital, available, and ready to assist the specialty will get the notifications first. Once you have clicked on the case to confirm that you can do it, you are in a priority list based on time. It is first come first serve if two people click at the same time.

I have a question and its not answered here

Just email us at support@opalert.com.au and we will get back to you ASAP. Or visit us at www.opalert.com.au/support and fill out the form.

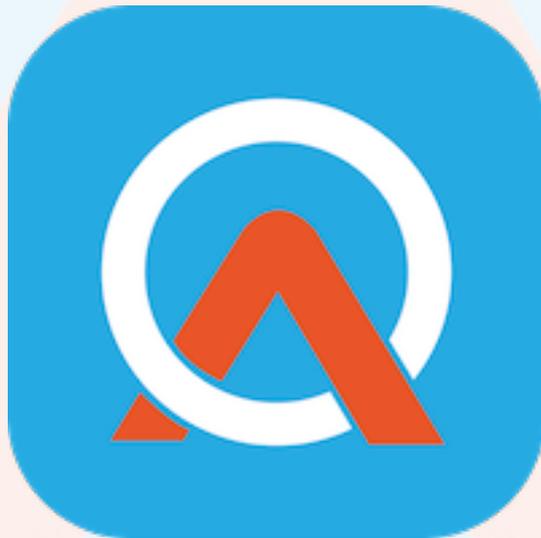

We look forward to you using OpAlert and welcome any comments.
