The History of OpAlert

What is it?

OpAlert takes care of a simple problem: Private surgeons finding anaesthetists, and surgical assistants for their lists. The short of it is that OpAlert is a FREE service for Surgeons, and is the most time efficient way to secure your team.

Why was it created

Created through the minds of Surgeons, Anaesthetists and Surgical Assistants, a team of like minded individuals throughout Australia developed one of the most advanced and tested apps available, and the first of its kind in one dedicated function:

To make the lives of Surgeons easier

Did you know that up to 84 minutes per day can be spent by a Surgeon, Personal assistant or Secretary trying to finalise the Anaesthetists and Surgical assistant for an operating list? Your PA will never tell you, but it can be incredibly hard doing this and an endless source of frustration. The only thing worse than this, is doing it yourself!

Where is it based?

OpAlert is Australia wide. Our home base is in Adelaide, and our team is spread out across Australia. Our entire team of coders, developers, servers and doctors are all based locally, so you can trust that everything is Australian Owned, and operated.

Who is OpAlert for?

Private Surgeons who want the easiest access to good anaesthetists and surgical assistants. We have verified each and every person into the OpAlert app. The people that are coming to attend your case are the ones that want to be there! Don't spend time making phone calls, sending endless text messages or waiting for your PA to let you know that your team is sorted. Tap the details of your case whilst you're walking to a coffee shop and you will probably have your team sorted by the time you have finished drinking your coffee!

How does it work

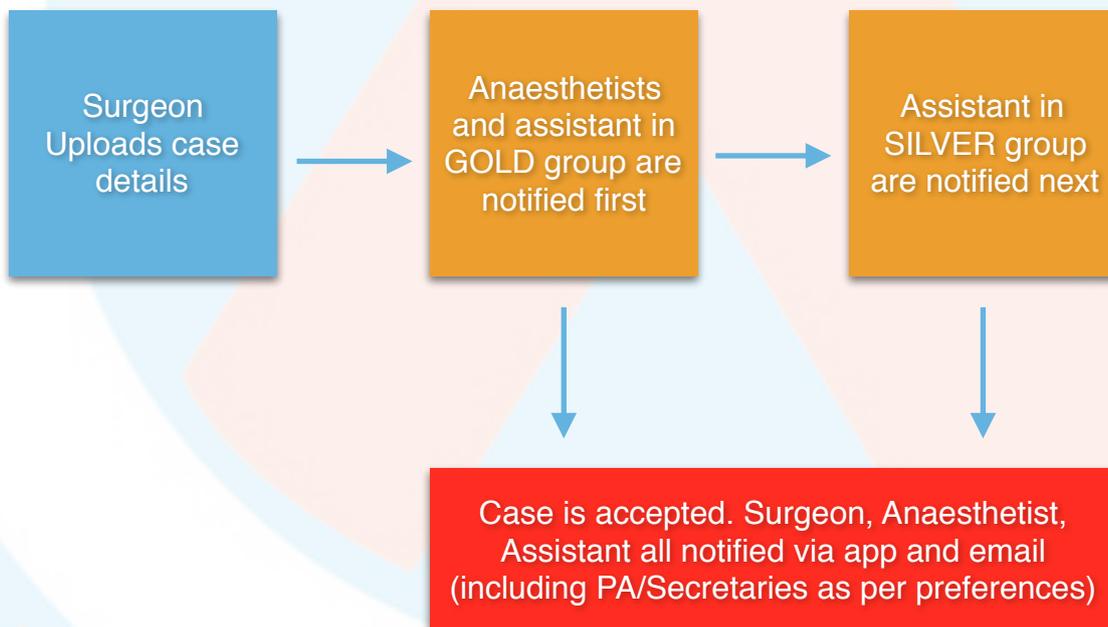

Setting up your account

Surgeons need to sign in themselves. This allows OpAlert to verify your account. To do this, you will need to obtain your RACS ID or another form of supporting documentation (if you do not have a RACS ID). Our team will verify your account, along with your identity (Some form of identification confirming your name and address is necessary). After you have placed your email address and chosen a password, you can input your preferences. You can choose:

- The best email address for your personal assistant or secretary
- Your favourite anaesthetists
- Your favourite assistants
- What hospitals you work at

Once you've sent these details, we will approve your account. Have a problem? Send us an email at support@opalert.com.au and we will get back to you within 12 hours.

How does the notification system work

A surgeon will upload a case via the iOS or Android app (or via the web app). Anaesthetists and/or Surgical Assistants will be notified according to their category. Those in the GOLD group will be notified first. Then those in the SILVER group (for assistants). If none of these members take a case, then the case is listed for others to take this.

A blocked doctor will NEVER be notified of your case or see your case

Frequently Asked Questions

How much does it cost

The best part of all of this, is that its FREE to use, for Surgeons.

Why do I need to put down my PA's email?

You don't have to, but we felt that you might benefit from your PA knowing where you are. You can leave this field blank, however if you put their details in here, your PA will always know where you are, what you're doing, and who is helping you - making their life easier in the process.

How Secure is OpAlert?

We take security very seriously. In fact, our SSL encryption is one of the highest in the industry standards. All data is encrypted, and sent over encrypted channels. Our servers are all based in Australia meaning that your data is never going back and forth around the world.

OpAlert will never distribute or release your information to 3rd parties, unless required to by Australian law.

Do I have to use OpAlert for all my lists?

Absolutely not. We want you to use OpAlert when you need it. The best part of this, is that you can use it once a day, once a week, or every now and again, when you're doing that case that you don't have your regular anaesthetist or assistant for. Just download the app, and have it handy, as you will need to be verified before you can upload your list.

What happens if I need to change the details of a case?

We know that things happen, like a change of start time, a few cases added, or more. Just edit your case within your iOS, Android or Web App and resubmit this. Depending on what you've changed, OpAlert will either reconfirm with your team, or re-notify your team. Either way, you're covered. And if one of your team can't make it, OpAlert will find you a replacement straight away, without you having to perform 1 more second of administration.

I need to talk to my anaesthetist about a difficult case.

Once your anaesthetist has confirmed their involvement with your list, you will each be provided with direct contact details. This uses the contact details you have used within the app, so please ensure these are up to date.

Can I customise my team so I only have my favourites attend?

Of course, just tell them to sign up to OpAlert, and block all other people in OpAlert. We will send you a list of all the anaesthetists / assistants added each week and you or your secretary can block

them all, and only allow your notifications to be put through to your favourite team. As long as they are signed up to OpAlert, you will only notify them!

I have a question and its not answered here

Just email us at support@opalert.com.au and we will get back to you ASAP. Or visit us at www.opalert.com.au/support and fill out the form.

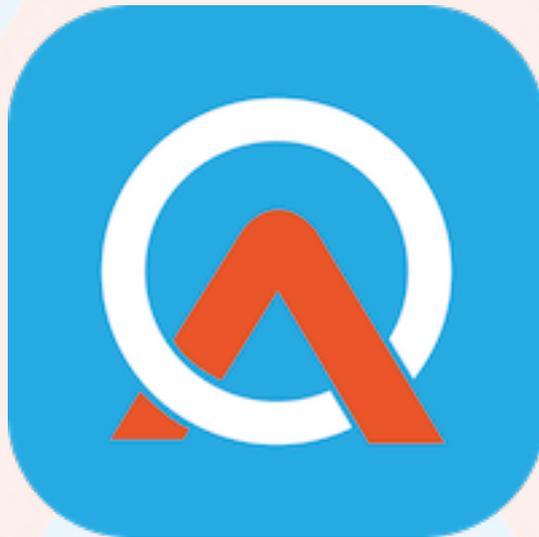

We look forward to you using OpAlert and welcome any comments.
